

Comment from Walter Borntrager

V2X is a serious threat to privacy and freedom! This must not be a mandatory feature of vehicles! This would be tantamount to requiring everyone to use GPS ankle bracelets like a prisoner!

An appropriate law would be to require vehicle manufacturers to provide the ability to completely remove any V2X electronics from their vehicle!

I am a veteran as was my father. V2X would remove freedoms that my father and I - and tens of millions of others - have offered our lives for!
