

Comment from Robin Bloomgarden

DOT,

Regarding your V2X Communications, Docket ID: DOT-OST-2018-0210, I am not interested in any connected cars! If you insist on having every car connected, then please make it so I can turn it off if I want to!

This technology is just one more assault on my health which is already being assaulted by wireless radiation from every direction! I cannot survive in a world completely dominated by wireless radiation! Nobody will survive for long.

Yes to a plain old radio in my car, but NO to more radiation devices in every corner of it, on all buses, trains, planes, etc.

Here are two links that discuss the many negative issues of cell phones, 5G, Smart Meters, and wireless technologies, which all use radiation, some are even worse than others :

Environmental Health Trust <https://ehtrust.org> and WHAT ARE 5G AND THE INTERNET OF THINGS? <https://whatis5g.info>

Please educate yourselves.

Sincerely,

Robin Bloomgarden
