

## Comment from Atiya Ismail

To Whom It May Concern:

I do not want to have or pay for connected vehicles and their required infrastructure. Research has proven, again and again, that wireless communication is biologically dangerous. The only acceptable radio in cars are the ones that can be easily turned off or removed. Further evidence shows that technology is not better than human drivers. Complete reliance on automated programs will decrease an individual's capacity for driving safely!! It will not make things better

Sincerely,  
Atiya Ismail
