

Comment from Andrew Jensen

We own a 2010 Tahoe and just found out about this recall via OnStar, not GM. I called the dealership and they stated there is nothing that can be done at this time, and GM considers the vehicle safe to drive. That is not very reassuring, and I sure do not trust GM on that point. It appears there is nothing GM will do at this point. Please do what you can to force GM to replace the potentially faulty air bags - you have the ability to ensure that no additional lives are lost due to this faulty equipment. Do the right thing. Thank you.
