Have you people lost your minds? Do you realize how much radiation you are responsible for exposing humans and other life forms to? Are you aware that there are those who are ready to hold you liable and accountable for what you are doing and that such liability exists not just in this realm, but in the next? Hence, you will be paying the price for what you are doing. and also for what you have done in the past, for a loooooong, long time.

Are you also aware that liability extends to you, not just in your role as actors for the government, but also as INDIVIDUALS, with names, addresses, phone numbers, etc., as well as bank accounts, properties. businesses, etc. that may become indebted to those who hold you liable?

Just thought I'd mention it in case you didn't know. If I were you, I would step very carefully right now because the American people are waking up. And your time is about to come due. Either you stop doing things to deliberately hurt people or you will pay the price.

Big time.
