"Re: self-driving vehicles..."

The sooner the better !!! Human beings SUCK at driving... They are always distracted, drunk, tired and or confused...

No driving, = no drunk driving!!! That alone is reason to move forward rapidly...

No driving, = no driver's licensing and enforcement... more enormous cost savings...

I could go on and on, but in my almost 50 years of driving, I've been in a handful of accidents. ...*I* caused two or three of them, another *driver* caused the rest. *never* was it the vehicles at fault.

To reiterate, human beings suck at driving vehicles... They really shouldn't be doing it, especially when there are alternatives..."
